

**Localization Case:**

---

## 1. INTRODUCTION

The following document shall explore IMB Centers' activities and findings as part of its workstreams on investment facilitation and localization of manufacturing in RoK.

This localization case document shall provide the Operators with the relevant information for the consideration of implementation of the goods subject to localization at their respective projects subject to the availability of demands, satisfaction of requirements, including but not limited to the technical, quality, EDD, financial as defined by each separate Operator in line with their qualification and procurement policies and procedures.

Should Operator find information to be lacking or require clarifications on specific aspects of the information provided, IMB Center may obtain and provide such clarifications where necessary. Alternatively, contact details of the focal point from the investor have been made available for Operator convenience and further direct engagements.
